(Mobile Development) led by
Google, Gojek, Tokopedia &
Traveloka**

SUMMARY

I am last year student majoring in information systems at Jambi University. Since the first year of college, I've been very interested in programming. besides I completed class from university, I also improve my skills by taking additional lessons outside the university such as attending online workshops and seminars, taking online courses, and working on real projects.

I have experience on several web development projects over the past year. Good communication, organized tasks and problem solving skills make good teamwork and produce products as needed. I had an internship as a Software Engineer at PT. Telkom Indonesia (Witel Jambi). I have also won the Web Development Competition as the first winner. Apart from having skills in technology, I also have good leadership and organizational experience.
